

CROHN'S DISEASE MANAGEMENT: MAKING THE RIGHT TREATMENT CHOICE AT THE START

AUGUST 31st, 2021 | h. 2:00 pm CEST

Scientific directors: *Silvio Danese, Laurent Peyrin-Biroulet*

Inflammatory bowel disease (IBD) including Crohn's disease (CD) and Ulcerative Colitis (UC) are chronic diseases that significantly impact patients' lives. Novel diagnostic and interventional techniques, imaging modalities and the introduction of biologics and novel small molecule drugs have dramatically improved their management and outcomes.

The main aim of these webinars is to focus the attention of practicing IBD experts on the most novel imaging modalities, the use of new drugs, and how to integrate them in daily clinical practice.

Several interactive clinical cases will be presented and discussed.

FACULTY

Silvio Danese

Head IBD Center, Professor of Gastroenterology
Humanitas Research and
University Hospital Rozzano, Milan, Italy

Laurent Peyrin-Biroulet

Full Professor of Medicine IBD Unit
Department of Gastroenterology Nancy
University Hospital, France

Subrata Ghosh
